## Intro to Infection Prevention & Control–short course

<b>Program Code</b>	<b>Start Date</b>	<b>Program Length</b>	<b>Campus</b>	<b>Study Mode</b>	<b>Contact</b>
Introduction to Infection Prevention & Control	TBA	2 days	Mayfield Education Hawthorn	onsite short course	(03) 9882 7644

### **COURSE OVERVIEW**

The Infection Control Practitioner has responsibility for infection control practices over a broad range of areas within the health care setting. This short course is an introduction to the issues which confront the present day infection control practitioner. Many aspects of infection control covered in the course are applicable across a broad range of enterprises beyond health care. Since an infection control program is a requirement for accreditation for health care facilities, this is an ideal introductory course for staff with responsibility for preventing and controlling infection. This course provides a 'snap shot' of the longer certificate courses offered at Mayfield Education.

### **ENTRY CRITERIA**

This is an open entry program.

### **TRAINING PROGRAM**
